

Session 1:	Monday, May 3, 1999
Chairs: U. Kattner and T. Nishizawa	

8.30-8.40	<i>Welcoming Remarks</i> <u>I. Ansara</u>	
8.40-9.20	<i>The Determination of Thermochemical Data for CVD Using Ab Initio Quantum Chemistry Methods.</i> <u>C. F. Melius</u> and M. D. Allendorf	P. 1
9.20-9.40	<i>Critical behavior near the transition temperature analyzed by the Generalized Susceptibility calculated by the Cluster Variation Method</i> <u>T. Mohri</u>	P. 2
9.40-10.00	<i>Description of Al, Si ordering in aluminosilicates using the cluster variation method</i> <u>V. L. Vinograd</u> and A. Putnis	P. 3
10.00-10.20	<i>Adhesion Energy Calculation of Monomers on the Amorphous Surfaces of TaO, HSiC and Au Substrates by Molecular Simulation</i> P. Wu and <u>S.-W. Yang</u>	P. 4
10.20-10.40	<i>Verification of Gibbs-Thomson's Equation at the Vicinity of Solubility Limit by Utilizing the Macroscopic Composition Gradient Method</i> <u>T. Miyazaki</u> , T. Koyama and T. Kozakai	P. 5

10.40-11.10	Coffee Break
-------------	---------------------

Session 2:	Monday, May 3, 1999
Chair: G. Inden	

11.10-11.30	<i>Dynamical lattice instabilities and the phase diagram of W-Re</i> <u>G. Grimvall</u>	P. 6
11.30-11.50	<i>Modelling Intermetallic Phases – I - Au-Cu: Calphad-type assessments using Cluster Expansion Formalism and Cluster Variation Method</i> <u>S.G. Fries</u> , A. Kusoffsky, N. Dupin, W.A. Oates and B. Sundman	P. 7
11.50-12.10	<i>Modelling Intermetallic Phases – II - Laves and μ phases: Combining the Cluster Expansion and the Compound Energy formalisms</i> <u>N. Dupin</u> , A. Kusoffsky, S.G. Fries, A.W. Oates and B. Sundman	P. 8
12.10-12.30	<i>The Cluster/Site Approximation in Phase Diagram Calculations</i> <u>W.A. Oates</u> , F. Zhang, S-L. Chen and Y.A. Chang	P. 9

12.30-14.00	Lunch
-------------	--------------

Session 3:

Monday, May 3, 1999

Chairs: J. Ågren and B.J. Lee

14.00-14.40	<i>Thermodynamics of Nanomaterials</i> <u>A. L. Greer</u>	P. 10
14.40-15.00	<i>Driving Forces for Nucleation in Glass-Forming Metallic System</i> <u>M. Baricco</u> , E. Bosco and L. Battezzati	P. 11
15.00-15.20	<i>Thermodynamic Model of Amorphous Grain Boundary Interfaces in Liquid Phase Sintered Si₃N₄-Ceramics</i> <u>J.A. Golczewski</u> , H.J. Seifert and F. Aldinger	P. 12
15.20-15.40	<i>Elemental Study on Mechanical Alloying Metals with Ceramics on the Basis of Phase Diagrams</i> <u>T. Nishizawa</u>	P. 13
15.40-16.00	<i>Contributions to the FeAl-Phase Diagram from Vacancy Formation Measurements</i> <u>T. Hehenkamp</u> and R. Kerl	P. 14

16.00-16.30

Coffee Break**Session 4:**

Monday, May 3, 1999

Chair: J. Abriata

16.30-16.50	<i>Thermodynamics of Oxisulphide Systems</i> <u>J. Lehmann</u> and H. Gaye	P. 15
16.50-17.10	<i>The control of non-metallic inclusions in steel through the use of computational thermodynamics</i> <u>A. Costa e Silva</u>	P. 16
17.10-17.30	<i>Activity Measurements in Slag Systems by Gas-Equilibration Technique</i> <u>P. Fredriksson</u> , M. M. Nzotta, R. E. Añe and S. Seetharaman	P. 17

17.30-19.00

Poster Session

Session 5:**Tuesday, May 4, 1999**

Chairs: T. Mohri and P. Miodownik

8.30-9.10	<i>On diffusion techniques in phase diagram determination and a diffusion-activity model for the interpretation of interfacial reactions</i> A.A. Kodentsov and <u>F.J.J. van Loo</u>	P. 18
9.10-9.30	<i>Simulation of Diffusion Controlled Phase Transformations Using DICTRA</i> <u>G. Inden</u>	P. 19
9.30-9.50	<i>Calphad applied to the structural development in graded materials and joints of dissimilar materials</i> <u>J. Ågren</u>	P. 20
9.50-10.10	<i>Application of Thermodynamic and Mobility Data to Two-Dimensional Modelling of Dendritic Growth During Directional Solidification</i> <u>B. Böttger</u> , U. Grafe, D. Ma and S.G. Fries	P. 21
10.10-10.30	<i>Needs of Thermodynamic Information in Hard Metals Production</i> <u>B. Uhrenius</u>	P. 22

10.30-11.00

Coffee Break**Session 6:****Tuesday, May 4, 1999**

Chair: L. Kaufman

11.00-11.20	<i>Mathematical Simulation of Microstructure Coarsening in Multicomponent Systems</i> <u>A. Prikhodovski</u> , I. Hurtado and D. Neuschütz	P. 23
11.20-11.40	<i>Diffusional Solidification Behavior in 304 Stainless Steel</i> Jun Soo Bae and <u>Hyuck Mo Lee</u>	P. 24
11.40-12.00	<i>Thermodynamic Analysis of Solid State Metal/Si Interfacial Reactions</i> <u>Byeong-Joo Lee</u>	P. 25
12.10-12.30	<i>Thermodynamic Analysis of Selected Group III - Nitrogen Systems</i> <u>A.V. Davydov</u> , U.R. Kattner, W.J. Boettinger, M. Ider, W. Zhuang and T.J. Anderson	P.26

12.30-14.00

Lunch

Session 7:**Tuesday, May 4, 1999**

Chair: F. Hayes and R. Cohen-Adad

14.00-14.40	<i>Material selection methods as a guide for materials development: the example of magnesium based composites</i> <u>Y. Bréchet</u> , D. Landru and A. Pisch	P. 27
14.40-15.00	<i>The Alternate Mode for Assessment in PARROT</i> <u>B. Sundman</u>	P. 28
15.00-15.20	<i>Construction of a Thermodynamic Database: A Case Study of Ni-base Superalloys</i> <u>U.R. Kattner</u>	P. 29
15.20-15.40	<i>Methodology for Updating of a Thermodynamic Database for Steel</i> <u>N. Subasic</u> , M. Jacobs and B. Sundman	P. 30
15.40-16.00	<i>MSI Workplace, Access to Materials Chemistry Data and Knowledge</i> <u>G. Effenberg</u>	P. 31

16.00-16.30

Coffee Break**Session 8:****Tuesday, May 4, 1999**

Chair: P. Spencer

16.30-17.10	<i>"Two-Dimensional Phase Mapping" with Chemsage/F*A*C*T</i> <u>G. Eriksson</u> , C. Bale and A. Pelton	P. 32
17.10-17.30	<i>Thermodynamic Modeling of Lead and Zinc Distributions among Matte, Slag and Liquid Copper</i> <u>S.A. Degterov</u> and A.D. Pelton	P. 33

17.30-19.00

Poster Session

Session 9:**Wednesday, May 5, 1999**

Chairs: A. Pelton and W. Zhang

8.30-8.50	<i>Calculation of Strain Energy for Hexagonal Epitaxial Thin Film</i> <u>J. Shen</u> , S. Johnston, S. Shang and W. Zhurang and T. Anderson	P. 34
8.50-9.10	<i>Calculation of Phase Equilibria in the Ni-Al-Fe-Ti Alloy</i> <u>I. Ohnuma</u> , K. Ishikawa, R. Kainuma, H. Ohtani, B. Sundman and K. Ishida	P. 35
9.10-9.30	<i>Unified Concept for Random and Ordered Molecular Alloys</i> D. Mikailitchenko, <u>A. Marbeuf</u> , M. Cuevas-Diarte and H.A.J. Oonk	P. 36
9.30-9.50	<i>Al-Ga-Zn System: Discussion on new estimations and optimizations of the ternary</i> <u>M. Mathon</u> , K. Jardet, E. Aragon, P. Satre and A. Sebaoun	P. 37
9.50-10.10	<i>Problems Encountered in Modelling the Sigma Phase in the Nickel - Vanadium System</i> A. Watson and <u>F. Hayes</u>	P. 39
10.10-10.30	<i>Thermodynamic Modeling of some Silicate Melts</i> <u>J. Björkqvall</u> , Du Sichen and S. Seetharaman	P. 40

10.30-11.00

Coffee Break**Session 10:****Wednesday, May 5, 1999**

Chair: R. Ferro

11.00-11.20	<i>Modeling the Charge Compensation Effect in Silica-Rich Na₂O-K₂O-Al₂O₃-SiO₂ Melts</i> <u>P. Chartrand</u> and A. D. Pelton	P. 41
11.20-11.40	<i>Selection of Promising Quaternary Candidates from Mg-Mn-(Sc, Gd, Y, Zr) for Development of Creep-resistant Magnesium Alloys</i> <u>J. Gröbner</u> and R. Schmid-Fetzer	P. 42
11.40-12.00	<i>Thermodynamic Modelling of Spinel Phases</i> <u>H. Mozaffari-Jovein</u> , H.J. Seifert, H.L. Lukas and F. Aldinger	P. 43
12.00-12.20	<i>Prediction of lattice stabilities for bcc Ho and Er and fcc rare earths metals and assessment of the Ho-Tb, Ho-Dy, Ho-Er, Er-Tb, Er-Dy, Sc-Y and Sc-Nd systems</i> <u>S. Norgren</u>	P. 44

12.20-13.40

Lunch

8.30-9.10	<i>New Techniques to Study Materials: Application of Synchrotron Light (x-ray Diffraction), CCD-Instruments and Laser Techniques (Spectroradiometry).</i> <u>S. Saxena</u>	P. 45
9.10-9.30	<i>The Cu-Li-Mg System at Room Temperature - The $Cu_8Li_2Mg_{15}$ Phase.</i> M.H. Braga, <u>L.F. Malheiros</u> and M. Hämäläinen	P. 46
9.30-9.50	<i>Experimental technique for studies of physical properties of metals, alloys, and compounds at high P-T conditions using in-house X-ray facilities.</i> <i>New data on Co_6W_6C</i> <u>N.A. Dubrovinskaia</u> , L.S. Dubrovinsky and S.E. Saxena	P. 47
9.50-10.10	<i>Thermodynamic Activities, Phase Equilibria, and Lattice Site Occupancies in the Alloys of the Ti-Al-Nb System.</i> M. Eckert, D. Kath and <u>K. Hilpert</u>	P. 48
10.10-10.30	<i>The study of phase equilibria in the Ti-V-N/C systems at 1200 °C</i> <u>A. Kroupa</u> , J. Bursik, M. Svoboda and G.C. Weatherly	P. 49

10.30-11.00

Coffee Break

11.00-11.20	<i>Test of Darken's Ternary Quadratic Formalism by Knudsen Effusion Mass Spectrometry of Cu-Au-Ge Alloys.</i> M. Miller and <u>K.A. Gingerich</u>	P. 50
11.30-11.50	<i>Standard Enthalpies of Formation of Some 3d Transition Metal Gallides by High Temperature Direct Synthesis Calorimetry</i> <u>S.V. Meschel</u> and O. J.Kleppa	P. 51
11.50-12.10	<i>Thermodynamics of the Ir-In system.</i> <u>P. Anres</u> , P. Fossati, K. Richter, M. Gambino, M. Gaune-Escard and J.-P. Bros	P. 52
12.10-12.30	<i>Enthalpies of Formation of Al_3Ni_2: Experiment versus Theory.</i> K. Rzyman, <u>Z. Moser</u> , R.E. Watson and M. Weinert	P. 53

12.30-14.00

Lunch

Session 13:**Thursday, May 6, 1999**

Chair: T. Velikanova and K. Hilpert

14.00-14.40	<i>Experimental Study and Thermodynamic Calculation of the Phase Equilibria in the Cu-Sn-Mn System</i> <u>X.J. Liu</u> , I. Ohnuma, R. Kainuma and K. Ishida	P. 54
14.40-15.00	<i>A Thermodynamic Study of the System Co-Cr</i> <u>T. Lundgren</u> , R.E. Aune, A. Kusoffsky and S. Seetharaman	P. 55
15.00-15.20	<i>Thermodynamic Study of the Mn-Co-C System in the Temperature Range 1173-1273 K</i> <u>R. E. Aune</u> , M. Selleby, D. Sichen and S. Seetharaman	P. 56
15.20-15.40	<i>Thermodynamic Modelling in the Ag-Bi-Sr-Ca-Cu-O System</i> <u>B. Hallstedt</u> , J. Assal, L.J. Gauckler and C. Schüller	P. 57
15.40-16.00	<i>Phase Equilibrium Between Fluorite and Pyrochlore Structures in the ZrO₂-Nd₂O₃ System</i> <u>H. Ohtani</u> , R. Iwasaki, B. Sundman and T. Sakumu	P. 58

16.00-16.30

Coffee Break**Session 14:****Thursday, May 6, 1999**

Chair: C. Lemaignan

16.30-16.50	<i>Thermodynamic Calculation of the MgO-Al₂O₃-SiO₂ System</i> <u>R. Jayaganthan</u> , H.J. Seifert, H.L. Lukas and F. Aldinger	P. 59
16.50-17.10	<i>Thermodynamical Calculations Applied to the Fission Products Release from a Degraded Fuel Pin in VERCORS and VI Experiments and to Residual Power Distribution</i> <u>K. Froment</u> , F. Defoort, M. Baichi and G. Ducros	P. 60
16.50-17.10	<i>Phase Equilibrium Calculations in the Pu(Ce)-Ga-O System</i> <u>M. Stan</u> , T.C. Wallace Sr., D.P. Butt and R. J. Hanrahan Jr.	P. 61

17.10-19.00

Poster Session

Session 15:**Friday, May 7, 1999**

Chairs: S. Fries and K. Ishida

8.30-8.50	<i>Thermodynamic Calculations in the Ti-Al-O-N System</i> <u>H.J. Seifert</u> , A. Kußmaul, J. Golczewski, H.L. Lukas and F. Aldinger	P. 62
8.50-9.10	<i>Thermodynamic Optimization of Mo-Si System</i> <u>K. Bai</u> and J. Shen	P. 63
9.10-9.30	<i>Solid Phase Structures in Zinc containing Binary Systems</i> <u>H. Jin</u> , Y. Li and P. Wu	P. 64
9.30-9.50	<i>Thermodynamics of Cu-Pb-Fe-As system.</i> B. Onderka, T. Pomianek, J. Romanowska and <u>J. Wypartowicz</u>	P. 65
9.50-10.10	<i>Determine Liquid Phase Boundaries in Zn-Fe-M_x Systems</i> <u>N.-Y. Tang</u>	P. 66
10.10-10.30	<i>Formation and decomposition of iron carbides under metal dusting conditions.</i> <u>A. Schneider</u> , G. Inden and H.J. Grabke	P. 67

10.30-11.00

Coffee Break**Session 16:****Friday, May 7, 1999**

Chair: J.C. Tedenac

11.00-11.20	<i>Thermodynamic Analysis of the System Cyclohexane-Methanol</i> <u>P. Waldner</u> and H. Gamsjäger	P. 68
11.20-11.40	<i>Study of Gas-Solid Reactions Using Potential Phase Diagrams</i> <u>T. Gómez-Acebo</u> , F. Castro and M. Fuentes	P. 69
11.40-12.00	<i>The temperature and concentration dependence of electrophysical properties in the Tl-Se system</i> V. Sklyarchuk, <u>Yu. Plevachuk</u> and V. Didoukh	P. 70
12.00-12.20	<i>Rheological properties of the cadmium telluride melts</i> L. Shcherbak, P. Feychuk, Yu. Plevachuk, <u>Ch. Dong</u> and V. Sklyarchuk	P. 71
12.20-12.40	<i>Calphad XXIX</i>	

12.40-14.00

Lunch
