

POSTERS

No.	Title and Authors	Page
1	<i>Thermodynamics of Solid Au-Sr Alloys</i> R.A. Alqasmi	73
2	<i>Enthalpy of formation of the Zn-Sn-In liquid system</i> P. Anrès, M. Gambino and <u>J.P. Bros</u>	74
3	<i>Stochastic thermodynamic modeling of the high temperature processes</i> <u>G.V. Belov</u> , V.S. Iorish and B.G. Trusov	75
4	<i>Thermodynamic, structural study and statistical model in the join</i> <i>Na₂Si₂O₅-Cs₂Si₂O₅</i> <u>F. Benmour</u> , R. Chastel, P. Thomas, J. Rogez, C. Bergman, C. Caranoni and J.C. Mathieu	76
5	<i>Experimental investigation and thermodynamic optimisation of the</i> <i>CsNO₃-KNO₃-NaNO₃ system</i> T. Jriri, <u>J. Rogez</u> , J.C. Mathieu and I. Ansara	77
6	<i>Experimental and Calculated Phase Equilibria in Fe-21%Cr-17,5%Mn Alloys</i> <i>with Different Nickel and Nitrogen Content</i> P. Brož, <u>J. Sopoušek</u> and Jan Vřešťál	78
7	<i>Experimental study of the γ and γ' equilibrium in Al-Cr-Ni and Al-Ni-Cr-Co</i> <i>Systems</i> <u>P. Brož</u> , J. Buršík, M. Svoboda and A. Kroupa	79
8	<i>Thermodynamic Analysis of Steels after Long-time Treatment</i> R. Foret, J. Sopoušek and <u>J. Vřešťál</u>	80
9	<i>A Thermodynamic Database for Corium. Applications in the Nuclear Safety</i> <i>Field</i> <u>P.Y. Chevalier</u> , E. Fischer and B. Cheynet	81
10	<i>Simulation of Sea Water and Natural Brines for Application to a Selective</i> <i>Extraction of Components</i> <u>R. Cohen-Adad</u> , M.-Th. Cohen-Adad, S. Mançour-Billah and L. Zayani	82
11	<i>Critical Evaluation and Thermodynamic Assessment of the Co-Ti System</i> <u>A. Davydov</u> , U.R. Kattner, B. Sundman and K. Ozaki	83
12	<i>Solidification Path in Simplified Alloys Representative of Ni Rich Welds</i> <u>S. De Vito</u> , N. Dupin, I. Ansara, G. Lesoult, D. Camel and B. Yrieix	84

No.	Title and Authors	Page
13	<i>A Comparison of Experimental and Calculated Phase Equilibria for Al-Ni-Re</i> <u>L.A. Cornish</u> and M.J. Witcomb	85
14	<i>Experimental Contribution to the Phase Equilibria in the System Zr_2Fe-Zr_2Ni</i> B. Doisneau-Cottignies, <u>M. Durand-Charre</u> and A. Antoni-Zdziobek	86
15	<i>Thermodynamic Calculations of Me-Me-N Systems (Me = Nb, Ta, Ti, V)</i> <u>K. Frisk</u>	87
16	<i>Thermodynamic data on Cu-In binary system</i> <u>Y. Feutelais</u> , Z. Bahari, E. Dichi, S. Fries and B. Legendre	88
17	<i>Critical Assessment of the Gold-Tellurium System</i> <u>A. Yassin</u> , Y. Feutelais, B. Legendre and R. Castanet	89
18	<i>Representation of Thermodynamic Properties of Quaternary Systems Using Interaction Parameters</i> <u>J. P. Hajra</u> , F. Aldinger, H. J. Seifert and R. Jayaganthan	90
19	<i>High Temperature Equilibria in the Ternary Fe-Ti-C System</i> S.-E. Amara, R. Kesri and <u>S. Hamar-Thibault</u>	91
20	<i>Thermodynamic Model of the Na-Hg System with Alkaline-Earth Metal Additions</i> <u>S.C. Hansen</u>	92
21	<i>Thermodynamic Optimisation of the Co-Cu System</i> <u>K.C. Hari Kumar</u> and P. Wollants	93
22	<i>Thermodynamic Calculation of the Co-Cu-Fe-Ni System</i> <u>K.C. Hari Kumar</u> and P. Wollants	94
23	<i>Thermodynamic Assessment of the Fe-Ti System with Special Emphasis on the Modelling of the FeTi (B2) Phase</i> <u>K.C. Hari Kumar</u> , Lucia F.S. Dumitrescu, B. Sundman, and P. Wollants	95
24	<i>In Search of a Real(istic) Equation of State</i> <u>M.H.G. Jacobs</u> and H.A.J. Oonk	96
25	<i>Coupled experimental and thermodynamic modelling studies for metallurgical smelting and coal combustion slag systems ($PbO-ZnO-FeO-Fe_2O_3-CaO-SiO_2-Al_2O_3$)</i> <u>E. Jak</u> , S. Degterov, B. Zhao and A.D. Pelton	97
26	<i>Spinodal Decomposition and Microstructural Change in Co-Cu-Fe Ternary Alloy</i> <u>T. Kozakai</u> , H. Kanda and T. Miyazaki	98

No.	Title and Authors	Page
27	<i>Numerical Simulation of Diffusional Reactions between Multiphase Alloys with Different Matrix Phases</i> <u>B.-J. Lee</u>	99
28	<i>Phase relations in the Tl-Ba-Ca-Cu-O system</i> <u>M. Lomello-Tafin</u> , Ph. Galez, Th. Hopfinger, J. Allemand, Ch. Bertrand, R.E. Gladyshevskii, M. Couach and J.L. Jorda	100
29	<i>New results on the Al-AlCo-AlNi system regarding the decagonal modifications</i> <u>R. Lück</u> , M. Scheffer, T. Gödecke, S. Ritsch and C. Beeli	101
30	<i>Thermodynamic Assessment of the Cu-La System</i> <u>Z. Du</u> , Y. Xu, C. Li and W. Zhang	102
31	<i>Thermodynamic Assessment of the Gd-Pd and Pd-Y Systems</i> <u>Z. Du</u> , H. Yang, C. Li and W. Zhang	103
32	<i>Thermodynamic Analysis of Ga-N-C-H System for - MOVPE Process</i> <u>C. Li</u> , Z. Du and W. Zhang	104
33	<i>The Irreversible Reaction in CVD Process</i> <u>W. Zhang</u> , C. Li and Z. Du	105
34	<i>Thermodynamic Evaluation of the Cu-Pb-Sn-Zn System</i> T. Jantzen and <u>P. J. Spencer</u>	106
35	<i>Update of the Thermodynamic Description of the Al-Mg-Cu Ternary System</i> T. Jantzen, S.G. Fries, M.G. Harmelin, <u>F. Faudot</u> , H.L. Lukas, P. Liang, H-J. Seifert and F. Aldinger	107
36	<i>Thermodynamic Calculations in the Al-Cu-Mg-Zn System</i> <u>P. Liang</u> , H. J. Seifert, H. L. Lukas, S. G. Fries, T. Jantzen and F. Aldinger	108
37	<i>Thermodynamic Assessment of the Zr-O binary System</i> <u>P. Liang</u> , H. J. Seifert, H. L. Lukas, S. G. Fries, N. Dupin, I. Ansara and F. Aldinger	109
38	<i>Thermodynamic contribution to the study of the ternary systems Zr-Nb-O and Zr-Sn-O</i> <u>N. Dupin</u> , I. Ansara and C. Lemaignan	110
39	<i>A thermodynamic data base for Zr alloys</i> <u>N. Dupin</u> , I. Ansara, C. Lemaignan and P. Barberis	111
40	<i>Comparison between Thermodynamic Predictions using the Zircobase Database</i> <u>C. Toffolon</u> , C. Servant and J.C. Brachet	112

No.	Title and Authors	Page
41	<i>Thermodynamic Assessment of the Fe-U System</i> <u>C. Guéneau</u> and C. Van Wambeke	113
42	<i>Thermodynamic and Phase Diagram Study of the Ternary U-Fe-O</i> <u>D. Labroche</u> , C. Chatillon, I. Hugon and O. Dugne	114
43	<i>Zirconium Alloys Database</i> <u>R. Jerlerud Perez</u>	115
44	<i>Some experimental results related with the Zr-Sn-X ternary systems (X = O, Fe, Ti, Nb)</i> D. Arias, S. Aricó, M. Canay, L. Gribaudo and N. Nieva	116
45	<i>Zr-Sn Phase Diagram. Experimental determinations and thermodynamic modelling</i> L. Roberti, L. Gribaudo and D. Arias	117
46	<i>Zr-rich region of the Zr - Nb - Fe system</i> <u>M.S. Granovsky</u> , E.M. Lena and D. Arias	118
47	<i>Fission Product Release from Molten Pools</i> <u>P.K. Mason</u> , C.G. Benson, M.S. Newland, M.P. Kissane and H. Manenc	119
48	<i>Kinetic and Thermodynamic Modelling of the Oxidation of TiCl₄</i> R. A. Barton, J. Henshaw, K. Hack and S. Petersen	120
49	<i>Predicting Martensite Transformations Temperatures in Fe-Mn-Si Alloys</i> <u>A.P. Miodownik</u>	121
50	<i>Nucleation Phenomena in the Ga-Bi Immiscible Alloys</i> <u>R. Novakovic</u> , E. Ricci and A. Passerone	122
51	<i>Thermodynamics and Phase Relations in the Al-Mg-Sc System</i> <u>J. Gröbner</u> ¹ R. Schmid-Fetzer, A. Pisch, G. Cacciamani, P. Riani and R. Ferro	123
52	<i>Thermodynamic modelling of the Al-Mg-Er system</i> <u>G. Cacciamani</u> , A. Saccone and R. Ferro	124
53	<i>Phase Equilibria in the 75–100 at% Al region of the Y-Al-Ni ternary system</i> <u>R. Raggio</u> , G. Borzone and R. Ferro	125
54	<i>Projections and Sections of Phase Diagrams</i> <u>V. Raghavan</u> and D.P. Antia	126

No.	Title and Authors	Page
55	<i>Application of Computational Thermodynamics to the Solid-Liquid Reactions in the Galvanneal Process</i> <u>F. Rizzo</u> , F.T. Fernandes, R. Avillez and A. Costa e Silva	127
56	<i>Ternary Metal Boron Carbides</i> <u>P. Rogl</u> and H. Bittermann	128
57	<i>Interatomic Potentials for Carbon Interstitials in Metals</i> M. Ruda, D. Farkas and <u>J. Abriata</u>	129
58	<i>Formation enthalpy of Ni₃Al-based alloys with chromium additions by direct reaction and solution calorimetry method</i> <u>K. Rzyman</u> and J.-C. Gachon	130
59	<i>Phase Equilibria in Hg-Ba-Ca-Cu-O System</i> <u>D. Sedmidubský</u> , J. Leitner, K. Knížek and A. Strejc	131
60	<i>Thermodynamic modelling of the order-disorder transition of the orthorhombic phase of the Al-Nb-Ti system</i> <u>C. Servant</u> and I. Ansara	132
61	<i>Thermodynamic Properties of Liquid and Amorphous Phases</i> <u>Q. Chen</u> and B. Sundman	133
62	<i>Applications of THERMO-CALC Aqueous Solution Databases</i> <u>P. Shi</u>	134
63	<i>Applications of THERMO-CALC and DICTRA in Materials Design</i> B. Sundman, J. Ågren and <u>P. Shi</u>	135
64	<i>The SGTE Solution Database Workshop</i> SGTE Members and Invited Participants	136
65	<i>Methodology for Updating of a Thermodynamic Database for Steel</i> <u>N. Subasic</u> , M. Jacobs and B. Sundman	137
66	<i>Development of a Thermodynamic Database for Hard Materials for Design and Processing Simulations</i> <u>L.F.S. Dumitrescu</u> , M. Ekroth and B. Jansson	138
67	<i>The TiNi-TiOs System</i> T.Ya. Velikanova, E.L. Semenova and <u>T.G. Mazhuga</u>	139
68	<i>Phase Equilibria in the Cr-Nb-C System at High Temperature</i> O. I. Dovbenko, A. A. Bondar and <u>T. Ya. Velikanova</u>	140

No.	Title and Authors	Page
69	<i>Phase Equilibria in the Cr-Tc-C System</i> A. V. Grytsiv, A. A. Bondar and <u>T.Ya. Velikanova</u>	141
70	<i>Analytical description of the short-range and long-range orders in alloys with many-body atomic interactions</i> <u>R.V. Chepulskyy</u>	142
71	<i>Effect of Elements X (X:Al, Cr, Mn, S or Si) on Compositions of Miscibility Gap in Liquid Fe-Cu-C System</i> <u>K. Yamaguchi</u> and Y. Takeda	143
72	<i>In-situ Detection of Metastable Phase Formation from the Bulk Glass and the Liquid States of Zr-based Alloys using Synchrotron Radiation</i> <u>A.R. Yavari</u> , A. LeMoulec, K. Toussimi, G. Vaughan, A. Kvik, A. Inoue and W.J. Botta Filho	144
73	<i>Primary Crystalline Phase Nucleation Regime in Amorphous Alloys is Non-Steady-State</i> <u>A.R. Yavari</u> and D. Negri	145
74	<i>Experimental Investigation and Thermodynamic Description of the Cr-Si-Ti System</i> <u>Y. Du</u> and J.C. Schuster	146
75	<i>EMF-Measurements in Solid Ga-Ni Alloys with Special Attention to the Ni₃Ga Phase</i> <u>W.Yuan</u> , A. Mikula and H. Ipser	147
76	<i>Prediction of the Thermodynamic Properties in the Ternary System Ga-Ge-Sb</i> <u>A. Kostov</u> , D. Živkovic and Ž. Živkovic	148
77	<i>Comparative thermodynamic analysis of the Bi-Ga_{0.1}Sb_{0.9} section in the Bi-Ga-Sb system</i> <u>D. Živković</u> and Živan Živković	149
